

BALLISTIC BLANKET

OVERVIEW

The IMPERIAL ARMOUR ballistic blanket provides a portable, flexible, lightweight multi-purpose means of ballistic protection.

It is manufactured from multiple layers of aramid fabric, within a durable coated nylon cover. Heavy-duty nylon webbing loop handles make it easy to carry, with rectangular cabin floor webbing providing multiple anchor points to enable cargo to be secured down. The blanket folds for compact storage.

This ballistic blanket is versatile and can be adapted to different threat levels as mentioned below.

STYLE

- The blanket can be folded for simple storage. The handles make transportation straightforward and deployment easy.

SIZES

The blanket measures a nominal 1.5m x 1.m.

COLOURS

The nylon cover and webbing handles are black. Different colours are available on request and can be made with flame retardant material

PROTECTION / FRAGMENTATION

The blanket is available in a range of fragmentation levels as detailed below as well as NIJ Level II and Level IIIA. All levels tested according to STANAG 2920.

V50	435 m/s	based on ballistic nylon (extremely cost effective)
V50	480 m/s	using Dyneema (incredibly light at 135grams per m ²)
V50	585 m/s	based on an aramid system
