

PARATAC HELMET

OVERVIEW

The Imperial Armour Paratac is a lightweight ballistic helmet that combines a new design with the most advanced aramid technology. While providing maximum comfort, it ensures excellent performance to weight ratio.

The Imperial Armour Paratac Helmet can be worn for extensive periods of time, even in adverse conditions, with superior comfort.

STYLE

- The helmet has a smooth conformal shape, is of low bulk and mass and has a durable finish.
- The edge is covered with a low profile neoprene rubber extrusion, which provides a forgiving and neat finish. The helmet is fitted with a fully adjustable harness system that can be released and removed.
- A comfort pad is fitted at the brow. This is covered with leather for perspiration absorption and comfort. The harness features a crown pad for comfort.
- The nape pad is fully adjustable to accommodate a variety of head lengths. This also provides added security of fit, resisting roll off during periods of high activity.
- A three-point chinstrap provides optimum retention. It incorporates sufficient adjustment to allow for gas masks and a large variety of head shapes and sizes. The adjusters are quick and easy to operate. A chin cup is integral with the chinstrap and is fitted with an easy clean plastic chin cup.

SIZES

Available in size large and harness adjusts to accommodate smaller or larger head sizes.

WEIGHT

The paratac helmet weighs less than 1kg at 925grams!

COLOURS

Standard colours are Navy Blue, Black and Olive Drab and UN Blue. Other colours are available on request.

PROTECTION
