

PAULSON CLEAR FORMED FACE SHIELD FOR SEVERE INDUSTRIAL USE

OVERVIEW

UV protective Polycarbonate Face shield (2,5 mm) for severe industrial applications.

Material

The face shield is made from polycarbonate by injection molding. Through that high quality process the shield has excellent optical properties and allows day to day long term use. The material at this thickness has high impact and heat resistance.

Note

Picture shows IM10-L8F together with head gear HG4-S to be ordered separately.

Specification

Window Size:	200 mm x 390 mm (8" x 15")
Material:	PC, Polycarbonate at 2,5 mm Thickness (0.08")
Color:	Clear
Filter:	UV Filter
Standards:	DIN EN 166:2002, DIN EN 170:2002 Annex II of the PPE-Directive 89/686/EEC; ANSI Z87.1
EN Marking:	2C-1.2 PMC 2 A 3 CE
