

### PAULSON CLEAR FORMED FACE SHIELD

---

#### OVERVIEW

UV protective Polycarbonate Face shield (1,9 mm) for severe industrial applications

#### Material

The face shield is made from polycarbonate by injection molding. Through that high quality process the shield has excellent optical properties and allows day to day long term use. The material at this thickness has high impact and heat resistance.

#### Note

Picture shows IM1-L6F together with helmet bracket CB2-HD; to be ordered separately and bracket accommodates a slotted cap. PAULSON does not supply industrial helmets.

#### Specification

Window Size:	230 mm x 330 mm (9" x 13")
Material:	PC, Polycarbonate at 1,9 mm Thickness (0.06")
